INTRODUCTION

This notice provides details of revisions to the *Standard Australian Classification of Countries (SACC)*, cat. no. 1269.0, with regard to the newly independent republics of Serbia and of Montenegro; updates to International Organization for Standardization (ISO) and UN Classification codes, and the emphasising of valid code options for some supplementary codes. The date of effect of these revisions is 22 January 2007.

This is the third revision to the classification since its release in 1998.

Revision 2.01 (21 December 1999) dealt with the cessation of Indonesian sovereignty in East Timor, the reversion of Macau to China, and the name to be used for 'Taiwan'.

Revision 2.02 (5 April 2004) covered the establishment of the state of 'Serbia and Montenegro'; ISO coding for East Timor; the removal of the 'Not Elsewhere Classified' supplementary code, as well as five changes to Alternative Country Groupings.

Acting Australian Statistician

SUMMARY OF CHANGES

REPUBLICS OF SERBIA AND MONTENEGRO

A majority of Montenegrins voted for independence from the state of Serbia and Montenegro in a referendum on 21 May 2006. On 3 June the Montenegrin Parliament adopted a declaration of independence, commencing the transition process for official dissolution of the state union of Serbia and Montenegro. On 5 June the Serbian Parliament voted to declare the Serbian Republic's independence and assumed the powers and obligations as successor of the former state union of Serbia and Montenegro.

Australia acknowledged the Republic of Serbia as the continuing entity of the former state union, and on 27 June 2006 recognized Montenegro as an independent republic.

Montenegro became the 192nd member of the United Nations on 28 June. Subsequently, the UN and ISO issued alpha and numeric codes for the separate republics of Montenegro and Serbia.

The SACC has been modified to reflect these changes. New entries 3214, Montenegro and 3215, Serbia have been added at the country level in Minor Group 32, South Eastern Europe within Major Group 3, Southern and Eastern Europe.

The country level unit 3213, Serbia and Montenegro, has been removed from the classification structure. Serbia and Montenegro, nfd has been included as supplementary code 0921.

Following the incorporation of the separate republics of Montenegro and Serbia in the SACC, the revised structure of Minor Group 32, South Eastern Europe is as follows:

- 32 South Eastern Europe
 - 3201 Albania
 - 3202 Bosnia and Herzegovina
 - 3203 Bulgaria
 - 3204 Croatia
 - 3205 Cyprus
 - 3206 Former Yugoslav Republic of Macedonia (FYROM)
 - 3207 Greece
 - 3208 Moldova
 - 3211 Romania
 - 3212 Slovenia
 - 3214 Montenegro
 - 3215 Serbia

SUMMARY OF CHANGES *continued*

OTHER CHANGES TO
CLASSIFICATION AND ISO
CODING

Aland (generally referred to as the Aland Islands) is an autonomous province of Finland. The ISO has recently changed its alpha and numeric codes for Aland Islands and these new codes are now reflected in the SACC.

Other ISO coding changes relate to entries and variants of:

- Gaza Strip and West Bank
- Guernsey
- Isle of Man
- Jersey
- Romania

VALID CODE OPTIONS FOR
OUTPUT

The issue of supplementary codes and their valid output is discussed on page 23 of the SACC, under 'Editing Specifications'.

In this revision, output codes for all 'Supplementary Codes for Former Countries and Other Geographic Entities' have been included (see Appendix 1 - Supplementary Codes in Details of Revision 2.03 Amendments section, below).

Supplementary codes that can be definitively output to a specific Minor Group, have been. Those that cross Major Group boundaries (such as Former USSR, nfd) are allocated to Inadequately Described (0000).

INTRODUCTION

Main Classification Structure

The number of country (third-level units) has increased from 245 in Revision 2.02 to 246. (Page 12.) Serbia and Montenegro (3213) was removed and the country level units Montenegro (3214) and Serbia (3215) were added.

Supplementary Codes

At the end of the section sub-titled Supplementary Codes for Former Countries and other Geographic Entities (page 18), add the following paragraph:

The 'Supplementary Codes for Former Countries and Other Geographic Entities' table (page 49) has been broadened to indicate the flexibility to output to a higher level of the classification structure, if desired. It displays an 'input' option (09..) and a classification 'output' valid code option (see also comments on page 23-4).

Coding Index

After the word 'acronyms' on page 21, insert:

(for example, US for United States of America)

INDEX ENTRIES

Appendix 3 of Revision 2.02 of the SACC detailed a breakdown of index entries between 3213, Serbia and Montenegro and 0913, Former Yugoslavia, nfd.

The creation of the separate republics of Montenegro and Serbia, as well as the creation of an extra supplementary code (0921) for the former joint entity, Serbia and Montenegro, required adjustments to the coding index entries. This was complicated by the existence of a 'Republika Srpska' - one of two constituent entities within Bosnia and Herzegovina. 'Republic of Srpska' will be coded to '3202, Bosnia and Herzegovina' while 'Republic of Serbia' will be coded to '3215, Serbia'.

The tables below show how a variety responses relating to the area of the former Yugoslavia, will be coded in future collections.
